ROWLEY CRESCENT
VINEYARD
MARLBOROUGH

This 25 acre vineyard is located just to the north east of Blenheim township. The block is planted in 100% in Sauvignon Blanc on phylloxera resistant rootstock.

The soil here is completely different to our Stoney Range block. This block has rich loam soil over clay and gravel. This generally means the vineyard is more vigorous than Stoney Range which means flavours are more gooseberry than tropical.

The fruit ripens about 8-10 days later than Stoney Range. The block is cane pruned in winter ont cht V.S.P trellis system to approximately 50-60 buds per vine and is intensively managed over the summer.
