Stratum 2009 Chardonnay

Analysis at Harvest: 23.5 Brix
 8.0 g/l Total Acid
 3.25 pH

The Stratum 2009 Chardonnay was select picked from our Glasnevin Vineyard in Waipara, North Canterbury.

The fruit was machine harvested in wonderful condition in mid April. After a gentle pressing the juice was settled and racked to tank for an indigenous fermentation. On completion of fermentation the wine was left in contact with the yeast lees for a further 10 months to help build structure and texture in the mid palate. the wine was then filtered and bottled.

The Stratum 2009 Chardonnay shows melon, pear and spice aromatics with a beautifully balanced palate.

This is a wine to be enjoyed on most occasions.

Analysis at Bottling: 3.48 pH
 7.0 g/l Total Acid
 13.5% Alcohol
 2.5 g/l Residual Sugar
